COMFORT
Soft light

A dazzling quality:

1. Full certification to CIE D65
2. Perfectly homogeneous direct/indirect lighting
3. Microprismatic diffuser and Blue Control LEDs
4. Made in France

Albédo D65, the top of the line of Degré K ceiling lights, is probably the best dental light ever designed.

Unique benefits:

1. No risk to the eyes
2. Daily anti-fatigue
3. Perfect sight and vision

Natural light D65, unequalled work comfort, health and eye protection, Albédo D65 is a vector of well-being in its own right.

degré°K

Treat yourself to the best for your *eyes*

Comfort

Luxury, calmness and voluptuousness

Designed to provide optimal working comfort, ALBEDO D65 offers undoubtedly the most enjoyable experience in terms of lighting, all fields.

Northern light

ALBEDO D65 provides a high level of indirect lighting that doubles the direct lighting. It provides an ideal distribution of light throughout the treatment room, without annoying contrasts, shadows or glare. **Maximum acuity is achieved without fatigue.**

Soft light

The brand new microprismatic diffuser of ALBEDO D65 eliminates any aggressiveness with its powerful direct light. The treatment room is bathed in a particularly pleasant light. **The lighting is soft and relaxing.**

Hygiene: Dustproof and disinfectable on the surface, it meets the requirements of asepsis in the treatment room.

Photobiological safety

It is the apple of your eye

Blue Control technology

It protects you from overexposure to blue LED light, which is harmful to your eyes and your chronobiological cycle. Your body is permanently protected.

Another advantage: no unwanted acceleration of light-curing.

Certified D65 Spectrum

Naturally excellent

ALBÉDO D65 is certified to comply with the D65 illuminant. This means that it does not content itself with copying the mere chromaticity of natural light, it reproduces its spectrum perfectly.

And that changes everything!

Permanent light therapy

Its lighting ensures that your biorhythms and your eyes function properly throughout the day. More than a care tool, **your ceiling light is also a vector of well-being in its own right.**

Perfect color recognition

Shade, micro-geometry, opalescence, transparency: all the many risks of error are avoided, whether during the diagnosis, the choice of color, the surgical procedure or the aesthetic reconstruction and stain. **The vision is perfect.**

High tech

It shines by its high technology

Design its ultra-thin frame concentrates the latest technologies and can be integrated into any type of treatment room.

2 versions

version D65.0 : On/Off

version D65.R : Connected, Dimmable and LUX+ (reinforcement of the lighting for surgery, dermatology, orthodontics). Ultra-simplified to use from the existing wall switch, it allows each user to adapt their lighting to their personal sensitivity.

Technical data measured in an ISO 17025 EN IEC accredited measurement laboratory • Made in France ISO 9001/2000 • European standards EN NF 12464-1 (professional lighting) & EN62471 (photobiological safety) • Certified according to the D65 illuminant defined by the CIE (BS950-1/D65 CIE D6500 visible part of emitted light 430nm-650nm)
